## Preamble

This is a legal agreement between you (either an individual person or a company) and Hartmann media solutions Hmedia. You agree to be bound by this agreement by installing, copying or using the PrintManager software.

If you do not have a valid license for the PrintManager software, you are not authorized to install, copy or otherwise use the software.

Provided that you have a valid license and you agree with the terms of this agreement, Hartmann media solutions grants you the following rights:

1. You may install as many instances of the PrintManager software as you want, if this is in accordance with this agreement.
2. You may copy the PrintManager software or documents that accompany this software in accordance with this agreement.

The information contained in this document and any other document belonging to the PrintManager software is subject to change without notice and does not contain any liabilities to incur by Hartmann media solutions. Hartmann media solutions takes no charge for any errors that may appear in these documents. Errors and omissions are excepted. Any documentation that accompanies the PrintManager software is licensed for internal, non-commercial reference purposes only.

No part of the PrintManager software or any PrintManager software artefacts may be in any form given to third parties.

Hartmann media solutions reserves all rights not expressly granted in this license.

You may not reverse engineer, decompile or disassemble this software except that you have a written permission by Hartmann media solutions to do so.

This license applies to all updates and supplements that Hartmann media solutions will provide.

Hartmann media solutions may terminate your license if you fail to comply with the terms and conditions of this license. In this case you have to uninstall all your instances of the PrintManager software and you have to destroy all copies of the software and any of its artefacts.

THIS SOFTWARE IS PROVIDED „AS IS“ AND ANY EXPRESSED OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL HARTMANN MEDIA SOLUTIONS OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

This product includes software developed by The Apache Software Foundation (<http://www.apache.org/>).

3 Path to PrintClient.exe in registry	8
<b><i>Bugs Fixed</i></b>	<b>9</b>
1 Local Print Character Encoding	9
2 Local Printing Empty Queues	9

---

# *New Features in Version 2.6.0*

## 1 E-Mail Function

### 1.1 Sending mail with the PrintClient GUI

The PrintClient Graphical User Interface (GUI) has now 2 more text fields and one more button to send a printout via email to one or more recipients. To send the printout a queue and a printstyle must be chosen as usual. Then a valid email address must be entered in the `Mail to` field and in the `From` field. As soon as a queue and a printstyle are chosen and the `Mail to` and the `From` fields contain valid email addresses the `Send` button becomes available. Clicking on this button will send the printout as a PDF file to the receiver.

If the printout should be sent to more than one receiver then all the recipients' addresses can be entered in the `Mail to` field separated by a semicolon.

### 1.2 Command line switches for sending mail

To send a printout via email from the command line there are two new command line switches. The recipients addresses can be given following the `-to` switch. The senders address can be given following the `-from` switch. The printout is send only if both switches are set. The following example will send the contents of the `TRAINING.RUNDOWN` queue from the `NRCS28` system, printed with printstyle `rundown.xml` to [sebastian@hmedia.de](mailto:sebastian@hmedia.de). The receiver of the mail will see [andreas@hmedia.de](mailto:andreas@hmedia.de) as the sender.

```
printclient.exe -s NRCS28 -q TRAINING.RUNDOWN -to  
sebastian@hmedia.de -from andreas@hmedia.de
```

### 1.3 SMTP Configuration

Before printouts can be sent as email the PrintClient SMTP configuration must be set up. The configuration can be found in the registry under the key `[HKLM]Software\Hmedia\PrintClient\SMTPConfiguration`. The following values can be set there:

host	The hostname of the SMTP server to use.
user	The user name to use when logging in to the smtp

	server
password	The password of the user.
ssl	If set to 1 the PrintClient will login to the SMTP host using an SSL connection. Defaults to 0.

## 2 Printing selected stories from a local database

Since PrintManager 2.5.0 it is possible to print selected stories from an iNEWS server database. With version 2.6.0 it is also possible to print out selected stories from a local database as long as an iNEWS client version 2.8.3.11 or higher is used. To print selected stories highlight the stories in the client and drag and drop them into the PrintClient window.

## 3 Path to PrintClient.exe in registry

The path to the PrintClient.exe file is now in the registry under [HKLM]Software\Hmedia\Printclient\PrintClientProgram. This path is used by the PrintClient clipboard monitor to start the PrintClient for single-click queue printing. By default the registry key is set to %ProgramFiles%\Hmedia\PrintClient\PrintClient.exe which is the default directory where the PrintClient is installed. If the PrintClient is installed somewhere else and you want to use the PrintClient clipboard monitor then you have to adjust the registry key to point to the PrintClient.exe file.

---

# ***Bugs Fixed***

## **1 Local Print Character Encoding**

If the character encoding settings for the local print are wrong then an error message will be displayed in the PrintClient.

## **2 Local Printing Empty Queues**

When trying to locally print an empty queue the user will be prompted an error message.
