New Features in Version 2.6.2

1 Attach XML Output to Email

With Version 2.6.2 of the PrintManager the source XML that was used to create a printout can be attached to a mail.

1.1 Attach XML Output to Email using the PrintClient GUI

The GUI has slightly changed. All Email options are now grouped in a box. Inside this box there is a CheckBox to 'Attach XML to Email'. If this box is selected then the printout and the XML source file that was used to create the printout is attached to the mail.

1.2 Attach XML Output to Email using PrintClient Command-Line switch

By adding the switch `-type 2` when calling the PrintClient from the command line the XML source file is attached to the email. Example:

```
printclient.exe -s NRCS28 -q TRAINING.RUNDOWN -to  
sebastian@hmedia.de -from andreas@hmedia.de -type 2
```
